New relationship advice e-book for guys is shorter to read than watching a football game

Relationship coach Daniel Amis has written his first book titled: What Every Woman Wants Her Man To Know for guys that's less than 50 pages. He reveals in this book many of the common problems that cause many relationships to fail- and what guys can do to prevent their relationship from being just another statistic.

Far Rockaway, New York --- January 23, 2008- Books that are written with as many pages as an encyclopedia are becoming a thing of the past.

“In today’s world, people want information from a book that’s to the point, short, and easy-to read.” Says Relationship coach Daniel Amis. *What Every Woman Wants Her Man To Know* covers topics such as communication, romance, and other issues that are important to women. Though many of these things are complex issues (and severely lacking in many relationships) it’s broken down in a simplistic, no jargon format, that guys can start working on right away.

Relationship coach Daniel Amis has gained over 10 testimonials for the book- and these testimonials come from other relationship experts, authors, and people who are highly credentialed and respected in their line of work. Daniel Amis proves that with these testimonials *What Every Woman Wants Her Man To Know* can be very beneficial for many guys. Especially since most of the testimonials have come from women.

What Every Woman Wants Her Man To Know is usually priced at \$29.95, but it’s currently being offered for \$19.95 for a limited time only. As an added bonus, guys will receive the free report titled: “How to bounce back from a break-up.” To order go to: http://www.relationshipadvice4you.com/Online_Store.html. Or send a money order to: Daniel Amis, 1420 Gateway Blvd Suite#4F, Far Rockaway, NY, 11691.
